Notes of explanation:

1. Tick size - the minimum value that the quoted price of a given Financial Instrument can change.
2. Lot - standard transaction unit for all of the Financial Instruments.
3. Min. trade volume - the smallest position size that can be opened in a single order, specified in Lots.
4. Max. trade volume - the biggest position size that can be opened in a single order, specified in Lots.
5. Min. Transaction step -relates to the volume of your order in Lots, is the least value of the change of the volume of order (increase or decrease).
6. Minimal Transaction Spread is the smallest value of the Transaction Spread obtained on Financial Instrument and is not an average achievable value.
7. Margin Rate - stated in percent value of deposit , that Client needs to have to open position. Calculated on the base of Nominal value.

8. If the Operating Register Balance exceeds PLN 800,000 (or the equivalent of this amount in the Account Base Currency), the Margin Rates posted in this Financial Instruments Specification in tables 1 to 3 are doubled.

The above applies to the following Financial Instruments:

EURUSD.pro, USDJPY.pro, GBPUSD.pro, USDCHF.pro, AUDUSD.pro, AUDCAD.pro, AUDCHF.pro, AUDJPY.pro, AUDNZD.pro, CADCHF.pro, CADJPY.pro, CHFJPY.pro, EURGBP.pro, EURCHF.pro, EURJPY.pro, EURAUD.pro, EURCAD.pro, EURNOK.pro, EURNZD.pro, EURSEK.pro, GBPCHF.pro, GBPCAD.pro, GBPJPY.pro, GBPAUD.pro, NZDUSD.pro, NZDJPY.pro, USDCAD.pro, USDNOK.pro, USDSEK.pro, EURPLN.pro, EURCZK.pro, EURHUF.pro, EURTRY.pro, EURZAR.pro, GBPPLN.pro, CHFPLN.pro, USDCZK.pro, USDPLN.pro, USDTRY.pro, USDZAR.pro, USDHUF.pro, US500.pro, US30.pro, US100.pro, US2000.pro, DE30.pro, PL20.pro, EU50.pro, FR40. pro, GB100.pro, CH20.pro, IT40.pro, ES35.pro, NL25.pro, AU200.pro, BRACOMP.pro, JP225.pro, USINDEX.pro, SILVER.pro, GOLD.pro, OILBRNT. pro, OILWTI.pro, COPPER.pro, SUGAR.pro, WHEAT.pro, OATS.pro, COFFEE.pro, COCOA.pro, COTTON.pro, SOYBEAN.pro, GASOLIN.pro, HOIL.pro, NATGAS.pro, LEANHOG.pro, PALLAD.pro, PLATIN.pro, CATTLE.pro

Recalculation of the 800,000 PLN threshold for Account Base Currency is carried out at the average NBP exchange rate announced on the previous Business Day, or in case of lack of such a rate, at the last available average exchange rate of the National Bank of Poland published before the conversion date. Checking the Operating Register Balance occurs twice a day (8:30 and 16:00). The Margin rates are determined according to the current level of the Customer's Operating Register Balance.

The change of the Margin is made immediately.

Operating Register Balance on Customer Account and Related Accounts within the TMS Connect Professional offering can be aggregated and Margin rates may be calculated from the aggregate Operating Register Balance of all Accounts.

9. Trading hours of particular Financial Instruments in the period from last Sunday of October till last Saturday of March are expressed in central european time (CET), while central european summer time (CEST) is used to express trading hours in period from last Sunday of March till last Saturday of October.
10. Quotes Tolerance - the parameter which determines if the price is correct during execution of the order. If difference between two prices (TMS and received from reputable Financial Institutions) at the same time, is greater than this parameter, the transaction is rejected. A detailed description of the orders execution can be found in the Best Execution Policy.

Example:

Clients sends an order to Buy 1 Lot EURUSD.pro at market price (instrument quoted with floating spread)

Quotes Tolerance for EURUSD.pro equals 0,00030

Price of EURUSD.pro at the time when order reaches TMS Brokers server equals 1,12000

Price received from reputable Financial Institutions (2-nd source) equals 1,11998

The system compares mentioned prices:

$|1,12000 - 1,11998| = 0,00002$

$0,00002 < 0,0003$, the condition is met, therefore order is executed at 1,1200

In the case of orders executed in manual mode, the Quotes tolerance for a given Financial Instrument is multiplied three times of value indicated in the Specification of Financial Instruments in the Quotes tolerance column .

Example:

The Quotes tolerance for the Financial Instrument indicated in the Specification of Financial Instruments in the Quotes tolerance column is 3. In this case, when executing the order in manual mode, the quotation allowance will be 9.

11. Max. trade volume for single Financial Instrument might be reduced in case of significant volatility or limited liquidity of the underlying Instrument, detailed terms and conditions are set out in the Terms of Business.
12. All orders are executed at the best volume weighted average price.
13. Some orders might be executed manually (see description in Best Execution Policy).
14. Required Margin is the sum of individual margins resulting from Client's positions.
15. In case of the change of Margin Rate for particular Financial Instrument, the new Margin Rate is applied to already outstanding positions.
16. If the Collateral Level falls to 100% or lower, we notify you by changing the color of the lower bar in the Transaction System in the installation version. It is a situation in which you get a so-called "Margin call". Opening a new position in the transaction system is possible in principle when the Free Margin level is positive and the level of the newly opened position is sufficient to cover the Margin. There is a special case in which it will be possible to open an opposite position on the same Financial Instrument when the Collateral Level will show a value of 100% or below. Such a situation will arise when, as a result of opening a new opposite position to already existing on the same financial instrument, the total value of the Margin for all open positions on that Financial Instrument will not be greater than the Margin for all open positions on the same Financial Instrument before the new opposite position is opened.

Example:

Opened outstanding positions:

DE30.pro buy 0.01 11325.7

DE30.pro sell 0.03 11321.9

EURUSD.pro buy 0.50 1.12865

EURUSD.pro buy 0.50 1.12865

Operational Register: Balance: 17 000 Equity: 15 000 Margin 16 143.45 Free margin: - 1 143.45 Margin level: 93%

Required Margin: sell 0.03 DE30.pro (larger leg - we take all buys and all sells on the same Financial Instrument and we check which is greater) and sum of two positions on EURUSD.pro.

We calculate the Margin according to the formula:

Required Margin = nominal value of the Transaction * Margin Account Rate * Exchange Rate

Required Margin for DE30.pro = 0,03 x 11321.9 x 25 EUR x 5% x 4.2906 = 1 821.68 PLN

Required Margin for EURUSD.pro = 100 000 (1 LOT) x 1.12729 x 3.33333% x 3.8113 = 14321.45

Collateral Required Margin = 16143.25

In this case, the Client couldn't open a new position on another instrument because Free margin is negative and Clients doesn't have sufficient funds to open a new position.

The maximum size of opposite position on EURUSD.pro will depend from opening price on EURUSD.pro and from the USDPLN exchange rate.

If the Client wants to open the SELL 1 Lot position on EURUSD.pro at price 1.1050 and the USDPLN 3.8000 exchange rate, he will be able to do this because the margin will be lower than the margin of original position (calculation below):

$EURUSD.pro = 100\ 000 (1\ LOT) \times 1.1050 \times 3.33333\% \times 3.8 = 13996,65$

On the other hand, if the Client wants to open the SELL 1 LOT position on EURUSD.pro at price 1.2050 and the USDPLN 3.9000 exchange rate, he will not be able to do this, because the required margin is larger than the margin of original position (calculation below):

$EURUSD.pro = 100\ 000 (1\ LOT) \times 1.2050 \times 3.33333\% \times 3.9 = 15664,98$

In this case, the maximum size of the opposite position on EURUSD.pro will be 0,91 Lot ($14321,45/15664,98 = 0,91$)

17. Rules of determining margin requirements:

- the exposure is determined for each of the Financial Instruments separately.
- for purposes of determining the exposure in a given Financial Instrument, the accumulated absolute value of the larger leg - long or short position (in a given Financial Instrument) is taken.
- Margin in notional terms for Financial Instrument is multiplier of the exposure and Margin rate.

18. In case of CFDs based on equities:

- short selling might not be possible for a given Financial Instrument. Changes in the availability of short selling may take place immediately.
- the minimum order size for CFDs on Equities and ETF's is 1 lot.

19. CFDs based on Polish equities are unavailable to trade for Clients who have concluded National Annex to the Framework Agreement.

20. In the case of all Financial Instruments, Client is obliged to monitor current information regarding transactional terms. In particular revealed in swap points tables, rollover tables, additional info about corporate rights and its equivalents, etc. Client is obliged to monitor her/his exposure all the time and in case of necessity and make changes to outstanding orders. TMS Brokers might delete pending orders in justified cases such as corporate actions, for example stock split.

21. In case of CFDs, where underlying instrument is futures contract, there is a cyclical change of price due to underlying contract termination and rolling over to next maturing contract. As a result Clients who hold the position will be debited or credited with the amount equivalent due to the change of price. There is a markup of TMS Brokers implied during this operation.

For example: Underlying instrument for OILWTI contract is CLK6 (Bloomberg ticker of West Texas Sweet Oil futures). New underlying that will replace CLK6 (expiration in May) is CLM6 (expiration in June). The difference in prices between two series CLK6 and CLM6 is 100 points, CLM6 series is quoted higher than CLK6 (market is in contango). Both short and long positions will be adjusted: long positions will have a negative adjustment of 102.5 points, short positions will have a positive adjustment of 97.5 points (including TMS markup). This operation is reflected in swap points on the platform.

22. For short positions on Equity CFD and ETF CFD, financing cost revealed in swap points, can not be positive.

23. Related Person - a client related to another Client, ascendant, descendant, sibling, spouse, parent or spouse's sibling, spouse or descendant siblings, a person remaining in an adoptive or person using the same as Client IP address of the computer or device mobile, using which transactions are concluded or the person using the same as Client device or the person who has the same as Client at least one of the addresses: residence, residence or mailing.

24. TMS Brokers establishes the limits for Financial Instruments indicated in column "Limit":
 - a. Exposure Limit - defined as a value of a Global Position Exposed to Risk. The exposure limit applies to all Accounts you have, as well as Accounts of Related Person to you,
 - b. Instrument limit - maximum volume of outstanding positions and pending orders in one direction (for example Buy) on one Account.
25. In case the limit is exceeded, Client is obliged to reduce its exposure on his own. In case Client is not reducing the exposure to be within the limit, TMS Brokers will be entitled to:
 - o refuse to execute new orders and reduce Clients exposure by closing positions on Clients account starting from the biggest position in terms of volume on particular Financial Instrument. In case there are positions with the same volume, TMS will reduce exposure by closing the one that was opened earlier.
26. If the Limit is reduced on Financial Instrument, the option of opening an opposite position will be blocked until the position is reduced to new Limit. In the case of reduction of Limit on Financial Instrument, TMS Brokers will not close the open position in accordance with the Limits in force on the opening date of the position.

Example :

The limit specified in the column "Limit" in the Financial Instruments Specification for Financial Instruments DE30.pro: 25 lots.

Open long position on the Financial Instrument DE30.pro: 25 lots. In such a situation, it is possible to open an opposite position on the Financial Instrument DE30.pro up to 25 lots short.

New Limit specified in the "Limit" column in the Financial Instruments Specification for Financial Instruments DE30.pro: 15 lots (reduction of the limit from 25 lots to 15 lots).

Open long position on DE30.pro Financial Instrument: 25 lots (you can still maintain a long position of 25 lots). In such a situation, it is impossible to open an opposite position on the Financial Instrument DE30.pro, until the position is reduced to 15 lots long.

27. TMS Brokers offers access to TMS Connect Professional through downloadable client terminal, mobile application or via web version of the platform available at www.tms.pl. It is recommended that Client uses all of them.
28. The price quoted in the transaction system cannot show a negative value. It also means that you cannot place pending orders with a negative price. In the event that underlying instrument reaches a negative price, TMS Brokers will suspend trading on the given financial instrument until further notice and at the same time close all open positions on the Client's account at the last non-negative price available in the transaction system.
29. TMS Brokers provides the TMS Connect Professional offer, through mobile versions, on terms and in accordance with the rules set out in the Regulations, TMS Brokers may expand or limit the scope of financial instruments supported by the Transaction System available through mobile versions. Client should be aware that mobile, web, client terminal version might have different functionalities, so TMS recommends to get acquainted with all of them in details before sending order.
30. The limit orders on CFD's on stocks and ETF's are charged a margin at the standard margin rates specified for the financial instrument.
31. The prices of AU200.pro; AU200.std; ES35.pro; ES35.std; EU50.pro; EU50.std; FR40.pro; FR40.std; JP225.pro; JP225.std are created on the terms described in the "Best execution policy" at Dom Maklerski TMS Brokers S.A

32. "Limit" orders are executed between 9:00 a.m. - 5:30 p.m. (CFDs based on: German, Spanish, French, Dutch, British equities).
33. "Limit" orders are executed between 3:30 p.m. and 10:00 p.m. (CFDs based on US equities).
