Pursuant to the provisions of Regulation 2017/576, TMS Brokers must make public a summary of the quality of execution on execution venues. Below is the information required by law:

a) an explanation of the relative importance that the firm has given to execution factors including price, cost, speed, likelihood of execution of the order or any other aspect, including qualitative factors, when assessing the quality of execution;

In the case of execution of orders, TMS Brokers takes all reasonable steps to obtain the best possible result for the client, taking into account, in particular, the price of the financial instrument, the costs associated with the execution of the order, the time of conclusion of the transaction, the probability of concluding the transaction and its settlement, the size of the order, its nature or other aspects having a material impact on the execution of the order.

A detailed explanation of the execution factors that TMS Brokers takes into account in order to obtain the best possible results for the client is included in the *Order Execution Policy at Dom Maklerski TMS Brokers S.A.*

b) a description of any close links, conflicts of interest and common ownership in relation to any execution venues used to execute orders;

There are no conflicts of interest between the execution venues used to execute orders and TMS Brokers.

c) a description of any specific arrangements with any execution venues in respect of payments made or received, discounts, rebates or non-cash benefits received;

There are no arrangements for payments, discounts, rebates or non-cash benefits received between TMS Brokers and execution venues.

d) an explanation of the factors that led to a change in the list of execution venues contained in the firm's execution strategy should such a change occur;

The list of execution venues was not changed in 2020.

e) an explanation of how the execution of an order depends on a category of clients where the firm handles different categories of clients differently and where this may affect the arrangements for the execution of orders;

TMS Brokers does not categorize clients from the point of view of order execution.

f) an explanation of whether, when executing orders from retail clients, priority was given to criteria other than direct price and cost and how those other criteria were helpful in achieving the best possible result for the client in terms of total remuneration;

In the case of a retail client order, the best possible result shall be determined overall taking into account the price of the financial instrument, the likelihood of the transaction being concluded, the costs associated with the execution of the order, which include all costs that the retail client would incur in executing such an order, including the fees charged by the execution venue, the clearing and settlement fees and any other fees paid to the third parties involved in the execution of the order.

g) an explanation of how the investment firm has applied any data or tools on the quality of execution, including any data published in accordance with Delegated Regulation (EU) 2017/575;

TMS Brokers regularly monitors the quality of order execution to ensure best execution for clients. The above is fulfilled in particular by:

1. Ex-ante price verification - prices available on the platform at the time of placing the order by the client are compared with prices from other Quote Sources / Reference Entities before the order is executed.
2. Ex-post price verification – TMS Brokers periodically verifies the quality of executed orders in order to identify weaknesses in order to execute processes and low quality of Quote Sources. The above is implemented in particular through:
 - comparing transaction prices to prices from other Quote Sources/Benchmarks,
 - verification of statistics on rejects and requotes,
 - verification of the realized deviations of transaction prices from the prices available on the platform at the time of execution of the order,
 - monitoring complaints about the quality of execution.

In the case of TMS Direct and TMS MiniDirect, verification takes place by analyzing statistics and reports published by Saxo Bank A/S on order execution and by comparing transaction prices to prices from other Quote Sources/Benchmarks.

A detailed explanation of the tools used by TMS Brokers to compare the quality of order execution is included in the *Order Execution Policy at Dom Maklerski TMS Brokers S.A.*

TMS Brokers does not use additional tools to measure the quality of order execution based on data published in accordance with Delegated Regulation (EU) 2017/575.

h) where applicable, an explanation of how the investment firm has used the information provided by the consolidated tape provider (CTP) within the meaning of Article 65 of Directive 2014/65/EU.

Not applicable.
