| Exchange rate for receivables (for fx CFDs) | Valuation at the BID price of the fx exchange rate to the account currency |
| VII. Other fees | |
| Fees for delivery of correspondence by post other than: change of the regulations, response to complaints | 10 EUR + 0,30 EUR per page |

* Or the equivalent in EUR or USD of this amount at the exchange rate of the National Bank of Poland as at the date of submission of the withdrawal instruction.

** The fee is charged if the Customer fails to make a transaction within 365 days on the Cash Account maintained by TMS Brokers for the benefit of the Client, unless the Client maintained open positions on this Cash Account during the indicated period or made the transaction in the period after 365 days and the moment of collecting the fee.. In the absence of sufficient funds, a fee is charged of free funds remaining on the Cash Account. The fee is charged from the following month in which the condition justifying its collection occurred

NOTES:

A commission or fee expressed in a currency other than the Account's Base Currency shall be converted into the Account's Base Currency at the Exchange Rate available in the trading system. Unless the context or provisions of the relevant terms and conditions of service provision indicate otherwise, the above fees and commissions include VAT at the applicable rates under separate provisions. The costs of third party banks - mediating the funds transfers - shall be borne by the Client.

The funds deposited on the Cash Account are interest-free. Interest earned on funds deposited on the Client's Cash Account constitutes remuneration for TMS Brokers for maintaining the Client's Cash Account and is intended to cover costs related to IT infrastructure.
Commissions are charged separately for the opening and closing of a position.
The commission is charged and debited to the cash account after the opening and closing of the position.

I. Examples of cost scenarios for transactions in the TMS Connect trading system

The following cost scenarios take into account the actual costs charged for the transaction in question.

The values given in the scenarios are illustrative and are intended only as a representation of the scheme of fees and commissions charged in the TMS Connect MT5 trading system. The standard transaction spread is a target amount, however, it may be subject to change in the event of events specified in the Regulations.

1. Scenario I

Client buys 1 CFD on DE30.std; the Account is denominated in PLN. Target transaction spread is 1.5. The position is held for 7 days.

| Transaction parameters | |
|---|---|
| Instrument | DE30.pro (Financial Instrument which price is based on DAX Index Futures contract quoted on Eurex Exchange) |
| Transaction volume | 1 LOT (1 CFD for DE30.std with a Nominal value of EUR*25) |
| Nominal value of transaction | PLN 1 351 479.75 (Opening price in D ₁ * Transaction volume * EUR/PLN exchange rate in D ₁) |
| Margin requirement at opening (in the base currency of the account) | PLN 67 573.99 (to calculate the required margin, the price of the MID Exchange Rate shall be taken into account) |
| Base currency of the Client's account | PLN |
| Type of transaction | Buy |
| Opening price in D ₁ | 12606.5 (in the sample quotation in the BID/ASK transaction system; 12605.0/12606.5) |
| Closing price in D ₇ | 12646.0 (in the sample quotation in the BID/ASK transaction system; 12646.0/12647.5) |
| Exchange rate, EUR/PLN in D ₁ | 4.2882 (calculated on the basis of current prices in the trading system at the moment of opening a position in D ₁ , with an example of a BID/MID/ASK quote: 4.2882/4.2892/4.2902) |
| Exchange rate, EUR/PLN in D ₇ | 4.2901 (calculated on the basis of current prices in the trading system at the moment of closing a position in D ₇ , with an example of a BID/MID/ASK quote: 4.2901/4.2911/4.2921) |

Calculations:

Cost of spread at the time of opening the position: $\frac{1}{2}$ spread (in Tick size) x 25 EUR x Transaction volume x EUR/PLN exchange rate at the moment of opening the position = $0.75 \times 25 \times 1 \times 4.2882$ = **80.40 PLN**

Cost of spread at the time of closing the position $\frac{1}{2}$ spread (in Tick size) x 25 EUR x Transaction volume x EUR/PLN exchange rate at the moment of opening the position = $0.75 \times 25 \times 1 \times 4.2901$ = **80.44 PLN**

Please note that the transaction spread for a DE30.pro instrument is variable, which means that it may vary depending on market conditions. The above value is illustrative.

Cost of holding position for 7 days (swap points) - PLN 0 (on the DE30.pro instrument swap points for holding position for the next day are not accrued, unless there is a rollover during this period)

Net profit(loss) for the Client: ((Closing price - Opening price) x 25 EUR x Position volume x EUR/PLN exchange rate (for closing the position)) = $(12646.0 - 12606.5) \times 25 \times 4.2901$ = **4236.47 PLN**

The figures do not take into account your personal tax situation, which may also affect your refund rate and total costs of investment.

Sum of costs incurred by the client in relation to the transaction: PLN 160,84

The ratio of costs to the Nominal value of the transaction: (160,84/1 351 479.75): 0,01%.

The above calculation does not take into account the cost resulting from the spread. This cost shall be included in the prices displayed in the trading system.

2. Scenario II

The Client buys CFDs, the price of which is based on CFD on Bitcoin to the U.S. Dollar on LMAX Exchange. The Account denominated in PLN, spread is floating and position is held for 5 days (during this time the position is rolled 4 times).

| Transaction parameters | |
|---|--|
| Instrument | BTCUSD |
| Transaction volume | 0.1 LOT (1 CFD for BITCOIN with a Nominal value of 1 Bitcoin * 1 USD) |
| Nominal value of transaction | PLN 3381.70 (Opening price in D ₁ * Transaction volume * EUR/PLN exchange rate in D ₁) |
| Margin requirement at opening (in the base currency of the account) | PLN 1691.45 (to calculate the required margin, the price of the MID Exchange Rate shall be taken into account) |
| Base currency of the Client's account | PLN |
| Type of transaction | Buy |
| Minimum Quotation Step | 0.01 |
| Opening price in D ₁ | 9605.46 (in the sample quotation in the BID/ASK transaction system; 9555.46/46/9605.46) |
| Closing price in D ₅ | 10021.89 (in the sample quotation in the BID/ASK transaction system; 10021.89/10071.89) |
| Exchange rate, EUR/PLN in D ₁ | 3.5206 (calculated on the basis of current prices in the trading system at the moment of opening a position in D ₁ , with an example of a BID/MID/ASK quote: 3.5206/3.52185/3.5231) |
| Exchange rate, EUR/PLN in D ₅ | 3.5343 (calculated on the basis of current prices in the trading system at the moment of closing a position in D ₅ , with an example of a BID/MID/ASK quote: 3.5343/3.53555/3.5368) |

Calculations:

The cost resulting from the spread at the time of opening the position: $\frac{1}{2}$ Transaction spread (in Tick size) x 1 USD x Transaction volume x USD/PLN exchange rate (for the opening position) = $50 \times 1 \times 0.1 \times 3.5206 = 17.60$ PLN

The cost resulting from the spread at the time of closing the position: $\frac{1}{2}$ Transaction spread (in Tick size) x 1 USD x Transaction volume x USD/PLN exchange rate (for closing position) = $50 \times 1 \times 0.1 \times 3.5343 = 17.68$ PLN

Please note that the transaction spread for a BITCOIN instrument is variable, which means that it may vary depending on market conditions. The above value is illustrative.

Cost of maintaining the position - swap point value: -85.2557 (the swap points are calculated with a minimum quotation step)

Cost resulting from the calculation of swap points: Transaction size x Minimum quotation step x Swap value in points x Exchange rate (USD/PLN) x Number of rollovers of positions = $0.1 \times 0.01 \times -85.2557 \times 3.59645 \times 4 = -1.23$ PLN

Swap points are calculated in the trading system around midnight CET. For the calculation of the swap point cost, the Exchange Rate prevailing at the time of the calculation of the swap points shall be taken into consideration on a case-by-case basis. The above value is averaged to simplify the example.

Net profit(loss) for the Client: (Closing Price - Opening Price) x Position volume x USD/PLN exchange rate at closing) - Cost resulting from the calculation of swap points = (10021.89 - 9605.46) x 0.1 x 3.5343 - 1.23 = 145.95 PLN

The figures do not take into account your personal tax situation, which may also affect your refund rate and total costs of investment.

Sum of costs incurred by the client in relation to the transaction: PLN 36,51

The ratio of costs to the Nominal value of the transaction (PLN 36.51/3381.70): 1,08%

The above calculation does not take into account the cost resulting from the spread. This cost shall be included in the prices displayed in the trading system.

3. Scenario III

The Client buys 0.1 Lot USD/PLN.std. The Account is kept in PLN. Spread 0.0025. The position shall be closed on the same day.

| Transaction parameters | |
|---|--|
| Instrument | USDPLN.pro (CFD for the instrument, which price is based on the USD/Zloty spot rate from the interbank market.) |
| Transaction volume | 0.1 LOT = 10 000 USD |
| Nominal value of transaction | PLN 35 375 (Opening price in D1 * Transaction volume) |
| Margin requirement at opening (in the base currency of the account) | PLN 1768.13 (to calculate the required margin, the price of the MID rate shall be taken into account) |
| Base currency of the Client's account | PLN |
| Type of transaction | Buy |
| Opening price in D ₁ | 3.5375 (in the sample quotation in the BID/MID/ASK transaction system; 3.5350/3.53625/3.5375) |
| Closing price in D ₁ | 3.5123 (in the sample quotation in the BID/MID/ASK transaction system; 3.5123/3.51355/3.5148) |

Calculations:

The cost resulting from the spread at the time of opening the position: $\frac{1}{2}$ Transaction spread x Transaction volume = $\frac{1}{2}$ x 0.0025 x PLN 10.000 = PLN 12.50

The cost resulting from the spread at the time of closing the position: $\frac{1}{2}$ Transaction spread x Transaction volume = $\frac{1}{2}$ x 0.0025 x PLN 10.000 = PLN 12.50

Please note that the transaction spread for a USDPLN.pro instrument is variable, which means that it may vary depending on market conditions. The above value is illustrative.

Cost of holding position for 1 day - swap points - 0 (not charged)

Net profit(loss) for the Client: (Closing Price - Opening Price) x Position volume = (3.5123 - 3.5375) x 10000 = PLN -252

The figures do not take into account your personal tax situation, which may also affect your refund rate and total costs of investment.

Sum of costs incurred by the client in relation to the transaction: PLN 25

The ratio of costs to the Nominal value of the transaction: (PLN 25/35 375): 0.07%

The above calculation does not take into account the cost resulting from the spread. This cost shall be included in the prices displayed in the trading system.
